EXPERIENCE SUMMARY

- A detail-oriented Computer Engineering graduate with a strong foundation in software development, AI and data analytics.
- Throughout internship and college projects, gained hands-on experience building AI-powered applications, integrating LLM APIs, applying ML classification and working with real-time analytics.
- Skilled in full-stack development using Next.js, TypeScript, Python, Supabase and MongoDB and have also designed Power BI dashboards for effective data visualization.
- Having good problem-solving mindset and focus on shipping production ready applications, also actively seeking entry-level opportunities in Software Development, AI Engineering, or Data Analytics.

WORKING EXPERIENCE

Mauli Infotech (OPC) Pvt. Ltd.

Intern (Software Developer) | [Project Overview](#)

1 Dec 2025 to 15 Feb 2026

- Engineered an automated AWR/ASH parsing pipeline that reduced SQL workload analysis from hours of manual DBA review to under 4 minutes, enabling faster bottleneck identification across 24x7 production workloads.
- Built high-load detection, time-window selection, and automated RCA execution modules that surface root-cause performance insights in real time eliminating manual, error-prone diagnostic processes.
- Designed and integrated a real-time performance dashboard that presents structured workload analytics clearly, helping DBAs prioritise tuning actions without manually scanning thousands of SQL entries.

PROJECTS AND INNOVATIONS

Real Time AI Voice Agent Interview Platform | [Source](#) | [Project Overview](#)

Tools: TypeScript, Next.js, Node.js, OpenAI GPT-4, Retell AI, LangChain, Supabase, Clerk

- Architected a full-stack interview preparation platform integrating Retell AI for real-time voice interviews, GPT-4 for adaptive question generation, and LangChain for RAG-based feedback spanning 13 features across mock interviews, aptitude training, and career management.
- Engineered an AI resume builder with Tesseract.js OCR, ATS optimisation, Puppeteer-based placement scraping across 6 company portals, and Clerk + Supabase RLS authentication.

Cyber Rakshak AI - Cybersecurity Threat Detection Platform | [Source](#) | [Project Overview](#)

Tools: Next.js, FastAPI, Python, scikit-learn, TF-IDF, Pandas, NLTK, TypeScript

- Built 4 independent ML models detecting scam messages, phishing URLs, fake jobs, and financial fraud trained on 12 real-world datasets using a multi-model ensemble with TF-IDF vectorization across 15,000 features
- Developed a 30-feature phishing URL scanner, Gradient Boosting fraud classifier, and a real-time analytics dashboard tracking threat distribution and scan trends across 11 scam categories

IPL 2026 Executive Analytics Dashboard | Power BI | [Source](#)

Tools: Power BI, DAX, Excel, Data Modeling, Data Visualization

- Built a 3-page interactive Power BI dashboard analyzing IPL 2026 team performance, batting statistics, bowling insights, and tournament KPIs using data modeling and DAX calculations.
- Developed advanced visualizations including treemaps, scatter plots, funnel charts, donut charts, and performance dashboards to transform raw cricket data into actionable insights.

ACHIVEMENTS

- **Finalist - [InnovGenius Ideathon 2026 \(ACM TCET × TCS\)](#)** : Selected among 700+ registrations nationwide; built and deployed CampusAI in the Final Round and industry-style onboarding automation SaaS with secure role-based access control and scalable multi-tenant architecture, evaluated by TCS industry judges.
- **Top 40 Finalist - [PIXELVERSE UI/UX Hackathon 2026 \(Google Developer Groups on Campus × SIESGST\)](#)** Designed and prototyped FixMyStreet in a national-level UI/UX hackathon a civic issue reporting platform with real-time complaint tracking, image-based issue reporting, location tagging, and community engagement features; selected among Top 40 teams nationwide.

Summary of Certifications and Skills

Certifications:

- Python for Data Science
- Machine Learning
- Advance Artificial Intelligence and Data Science

Technical Skills:

- **Languages:** Python, JavaScript, TypeScript
- **Web & Frameworks:** React, Next.js, Node.js, HTML, CSS, Tailwind CSS
- **AI & LLM Integration:** OpenAI / LLM APIs, Prompt Engineering
- **Data Science & Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Machine Learning:** Regression, Decision Trees, Random Forest, Model Evaluation
- **BI & Visualization:** Power BI (Dashboards, DAX Measures, Filters), Tableau
- **Databases:** MySQL, Supabase, MongoDB
- **Dev Tools & Platforms:** Git, GitHub, VS Code, Vercel, Linux
- **Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, Statistics
- **Soft Skills:** Problem Solving, Teamwork

EDUCATIONAL QUALIFICATION

Bachelor of Engineering in Computer Engineering (CGPA - 8.30)

- Pillai HOC College of Engineering and Technology, Rasayani.
- University of Mumbai (May 2026)

Higher Secondary School Certificate (Percentage - 65.73)

- Sudhagad Education Society's, Secondary and Higher Secondary College, Kalamboli.
- Maharashtra State Board Education (June 2022)

Secondary School Certificate (Percentage - 90.00)

- Sudhagad Education Society's, Secondary and Higher Secondary School, Kalamboli.
- Maharashtra State Board of Education (May 2020)
